

KAREN LEE

Kirkland, WA 98033 | 214-937-9678 | LKA527@GMAIL.COM | linkedin.com/in/karenleepm

PROFESSIONAL SUMMARY

Product leader with 14+ years of experience building commerce platforms end-to-end — defining product vision and strategy, prioritizing the highest-impact problems, and partnering with cross-functional teams of engineers, designers, and analysts to ship features that drive measurable revenue and adoption. Proven track record managing products through multiple lifecycle phases, analyzing large-scale, complex data sets to inform decisions, and integrating diverse stakeholder requirements into a single coherent product strategy. Experienced leading and mentoring product teams and communicating strategy with clarity to executive stakeholders. Recently completed Google training in Large Language Models and Responsible AI, and applies AI tools to redesign workflows and improve team efficiency.

CORE COMPETENCIES

- Product Vision & Strategy
- Cross-Functional Team Leadership (Eng, Design, Data, Sales, Finance)
- Data-Driven Decision Making
- 0-to-1 Product Development & Launch
- Roadmapping & Executive Communication
- AI-Enabled Workflow & Automation
- Requirement Gathering (BRD) & Prioritization
- Responsible AI Practices
- Agile & Scrum Methodologies

PROFESSIONAL EXPERIENCE

Senior Technical Program Manager — Worldwide Sales (B2B eCommerce & Enablement) | Apple Inc.

01/2025 – Current • Cupertino, CA

Scope: 6 global engineering teams | 3 enterprise systems | \$104B sales operations | 93 new product initiatives

- Defined multi-year product vision and roadmap for global sales systems, authoring requirements documents and vision narratives that aligned engineering and executive stakeholders, and partnering with Sales Ops, Finance, Legal, and regional teams to standardize scalable partner onboarding journeys across complex, multi-system environments.
- Translated business and customer requirements into technical solutions by working closely with engineering teams, delivering scalable features spanning CRM, catalog accuracy, and order-to-cash systems that improved partner onboarding and reduced friction for reseller, enterprise, education, and government partners.
- Used data-driven analysis to identify partner workflow bottlenecks and funnel drop-off trends across channels, delivering root-cause insights that directly prioritized platform roadmap and feature development.
- Led efficiency-driven system modernization across 93 new product initiatives, optimizing delta push workflows by 90% and reducing manual intervention by 60%, while maintaining a record of zero post-launch defects.
- Built an AI-driven dashboard to replace manual trackers, creating a real-time single source of truth that cut alignment overhead across business and engineering teams, and used AI to prototype dashboards and streamline recurring reporting.
- Own capability and enablement work for Guide, Apple's in-store B2B sales tool used by retail partners such as Costco and Best Buy to help store associates explain products to customers, including content-related updates, partnering with engineering, business, content, and strategy teams to speed up system performance and global rollout.
- Support Guide's global footprint across 21 languages and growing, coordinating with cross-functional and regional teams to ensure new capabilities and content changes roll out consistently across markets.

Senior Technical Product Manager — eCommerce, Head of Order to Cash (OTC) | Samsung Electronics America

05/2021 – 11/2024 • Bellevue, WA

Scope: 4 global engineering teams | 3 enterprise systems | \$20B sales operations

- Managed the product development lifecycle for Samsung.com's eCommerce operations, leading cross-functional teams to deliver customer-centric features across fulfillment, returns, and logistics.

- Partnered with solution architecture, QA, and 3PL fulfillment teams to design and scale Buy Online, Pick Up In Store (BOPIS), connecting online shoppers with 20,000 physical retail endpoints and securing \$100M+ in incremental revenue.
- Designed and launched a consolidated B2B commerce platform on Samsung.com with automated order submission, cancellation, extension, and activation workflows, streamlining merchant registration and driving \$42M in annual incremental revenue.
- Conducted comprehensive data analysis to identify process bottlenecks, developed user stories, and worked closely with 3PL and engineering teams to improve order processing and fulfillment.
- Redesigned returns and refunds infrastructure to enhance the end-to-end customer experience, driving 32% growth in Net Promoter Score (NPS) within 6 weeks and reducing refusal rate from 14% to 10%, saving \$1M annually.
- Led the SAP S/4 HANA rollout for North America eCommerce, managing data migration of 500k+ records, and built a real-time financial reconciliation dashboard in Tableau that caught A/R gaps between fulfillment centers and partner systems, preventing \$10M in annual payment losses.

Senior Product Manager — Mobile GTM and Strategy | Samsung Electronics America

09/2019 – 05/2021 • Plano, TX

- Conducted in-depth sales, market, and consumer behavior analysis to provide actionable insights for strategic planning, launching limited-time offers that contributed to a 25% increase in transaction value.
- Developed a retail merchandising strategy to place 2X mobile products in 20,000 U.S. retail stores, driving an 18% increase in sales volume.
- Aligned new product launch forecasts with market demand, reducing stockout and overstock scenarios by 10%.

Lead Product Manager — Global Sales & Marketing Platforms | American Airlines

03/2016 – 09/2019 • Fort Worth, TX

Scope: 2 global carriers | 1,700+ B2B users | 3 enterprise systems

- Owned product development for the MS Dynamics 365 CRM, delivering features that improved B2B sales performance and aligned platform capabilities with enterprise strategy.
- Directed a digital ecosystem transformation, managing and mentoring a team of 3 product managers to migrate core CRM structures from Salesforce to Microsoft Dynamics 365, delivering robust APIs and scaling adoption for 1,700+ B2B power users.
- Controlled a \$3.8M platform budget to architect and scale a multi-carrier contract and pricing simulation engine (Anaplan), integrating 700+ datasets across four global carriers (including JAL, BA, Iberia) to optimize margin structures and compress B2B onboarding lifecycles.
- Led the enterprise-wide GDPR compliance program for B2B systems, defining technical requirements and implementing data privacy policies across global sales, legal, and IT functions.

Product Manager — Core Enterprise Systems | Samsung Electronics America

10/2011 – 03/2016 • Richardson, TX

- Led systemic infrastructure unification for North America's largest corporate integration, merging three \$20B supply chain and reverse-logistics frameworks under a unified SAP environment with flawless business continuity.
- Owned product strategy and implementation for Samsung's return & replacement service, improving NPS by 40% and enabling \$20M in annual carrier cost savings.

EDUCATION & CERTIFICATIONS

Bachelor of Science: Information Sciences and Technology, 2007-2010

Pennsylvania State University, State College, PA | GPA: 3.72/4.0 (Graduated with Distinction)
